

When your measurements count, your test slides can't be in question.

**Performance – Price – Packaging ...**

Get the EMF Edge!

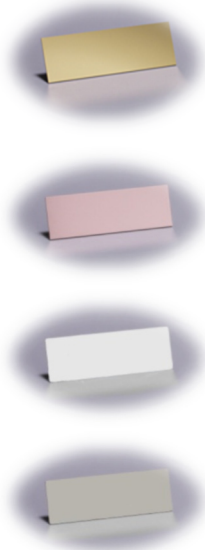

## Industry-Proven Performance

EMF provides a full line of standard metal slides, from Gold to Copper, Aluminum to Silver; and our 80+ years of experience ensures our slides will provide the performance you require.

From university research to industrial testing, whether you're an electronics fabricator or a medical technician, EMF has been supplying high performance slides to existing and emerging markets for decades.

### Stock Slides

**Gold** - Coated 50Å binder layer of either Cr or Ti, and 1000Å of Au.

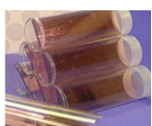

**Copper** - Cu ~500Å 10% Transmission Slides conform to ASTM D2671 and IPC-TM-650 test specification. Packaged in Nitrogen purged tubes.

**Silver** - Bare Ag at 1000 Å. Packaged in Nitrogen purged tubes.

**Aluminum** - Bare Al at 1000 Å.

All standard offerings available in 0.25"x1" and 1"x3"

### Packaged to Last

Cu and Ag slides are packaged in nitrogen purged tubes. For additional protection from the environment, we offer vacuum packed bags as an option.

1" x 3" Aluminum and Gold slides are packaged in 5 slide cases. 0.25" x 1" Aluminum and Gold slides are individually wrapped in lens tissue

### Made to Order Custom Slides

***Special requirements? Not an issue! - Call us and have a Coatings Engineer generate a quote for you!***

***Coatings up to 4000 Å***

***Sizes from 10mm to 6"***

***Need a protective coating or different slide substrate?***

***Float glass, quartz, polycarbonate, fused silica***

***SiO<sub>2</sub> Protective Coating***
